

## 分数

名前 (

)

計算をしましょう。

$$\frac{2}{4} + \frac{3}{4} = \frac{5}{4}$$

$$\frac{5}{9} + \frac{6}{9} = \frac{11}{9}$$

$$3\frac{2}{7} + \frac{5}{7} = 3\frac{7}{7}$$

$$= 4$$

$$1\frac{1}{7} + 2\frac{2}{7} = 3\frac{3}{7}$$

$$2\frac{6}{8} + \frac{5}{8} = 2\frac{11}{8}$$

$$= 3\frac{3}{8}$$

$$1\frac{4}{7} - \frac{2}{7} = 1\frac{2}{7}$$

$$5\frac{2}{3} - 2\frac{1}{3} = 3\frac{1}{3}$$

$$5\frac{1}{4} - 2\frac{3}{4} = 4\frac{5}{4} - 2\frac{3}{4}$$

$$= 2\frac{2}{4}$$

$$= 2\frac{1}{2}$$

$$3 - 1\frac{1}{3} = \frac{9}{3} - \frac{4}{3}$$

$$= \frac{5}{3}$$

$$4\frac{3}{8} - \frac{3}{8} + \frac{5}{8} = 4 + \frac{5}{8}$$

$$= 4\frac{5}{8}$$
